Table of Contents

20 Group theory and generalizations
22 Topological groups, Lie groups

26 Real functions
28 Measure and integration
30 Functions of a complex variable
31 Potential theory
32 Several complex variables and analytic spaces
33 Special functions
34 Ordinary differential equations
35 Partial differential equations
39 Finite differences and functional equations

40 Sequences, series, summability
41 Approximations and expansions
42 Fourier analysis

00 General
01 History and biography

02 Logic and foundations
04 Set theory
05 Combinatorics
06 Order, lattices, ordered algebraic structures
08 General mathematical systems

10 Number theory
12 Algebraic number theory, field theory and polynomials
13 Commutative rings and algebras
14 Algebraic geometry
15 Linear and multilinear algebra; matrix theory
16 Associative rings and algebras
17 Nonassociative rings and algebras
18 Category theory, homological algebra

20 Group theory and generalizations
22 Topological groups, Lie groups

26 Real functions
28 Measure and integration
30 Functions of a complex variable
31 Potential theory
32 Several complex variables and analytic spaces
33 Special functions
34 Ordinary differential equations
35 Partial differential equations
39 Finite differences and functional equations

40 Sequences, series, summability
41 Approximations and expansions
42 Fourier analysis
43 Abstract harmonic analysis
44 Integral transforms, operational calculus
45 Integral equations
46 Functional analysis
47 Operator theory
49 Calculus of variations and optimal control

50 Geometry
52 Convex sets and geometric inequalities
53 Differential geometry
54 General topology
55 Algebraic topology
57 Manifolds and cell complexes
58 Global analysis, analysis on manifolds

60 Probability theory and stochastic processes
62 Statistics
65 Numerical analysis
68 Computer science
69 General applied mathematics

70 Mechanics of particles and systems
73 Mechanics of solids
76 Fluid mechanics, acoustics
78 Optics, electromagnetic theory

80 Classical thermodynamics, heat transfer
81 Quantum mechanics
82 Statistical physics, structure of matter
83 Relativity
85 Astronomy and astrophysics
86 Geophysics

90 Economics, operations research, programming, games
92 Biology and behavioral sciences
93 Systems, control
94 Information and communication, circuits, automata
